You don't have to contract a house painter to complete the job

3mm thick vinyl siding

Energy Star rated thermal foam backing

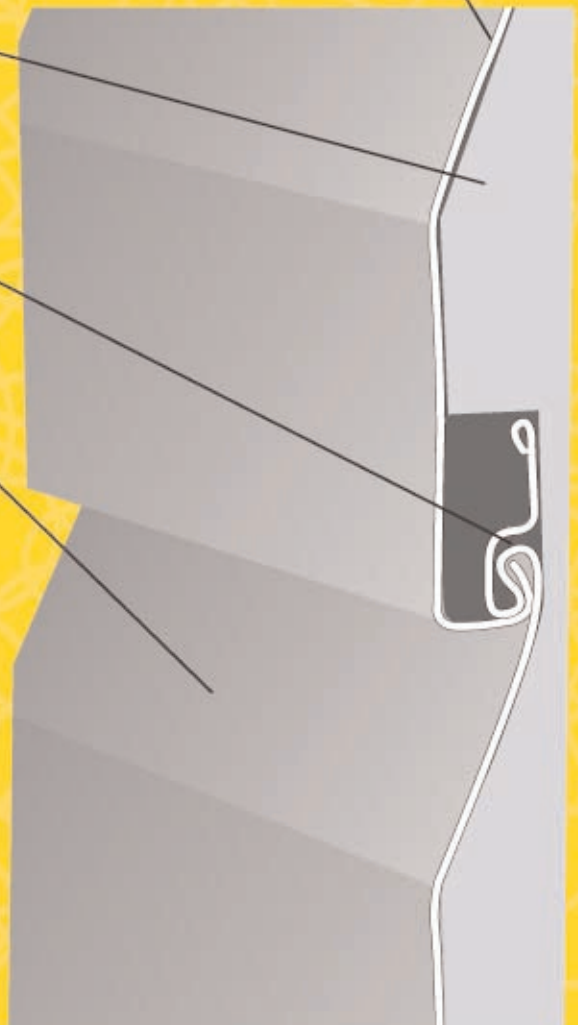

Unique Siding lock system

Available in many colors

up to **12** months  
no interest  
no payments  
with approved credit

**LIFETIME WARRANTY**  
(Materials and Labor)

# BEE FIBER CEMENT SIDING

## Color Flexibility.

Custom colors are available at no additional cost. BEE Fiber Cement can be painted **ANY COLOR** you imagine and lasts 3 to 4 times longer than with wood. The color is not susceptible to fading and there is a 15 year guarantee on the paint!

## Flame Resistance.

Non-combustible. Approved for fire-rated construction.

## Weather Resistance.

So durable it's guaranteed for up to 50 years, even in the most severe climates on earth.

## Pest Resistance.

Resistant to termites, woodpeckers and other pests known to cause damage.

## Durability.

Resists shrinking and swelling so it holds paint 3 to 4 times longer than wood.

# BEE SUPER ENERGY WALL VINYL SIDING

## Superior Insulation.

The Super Energy Wall backer provides up to three times the energy efficiency of standard siding. It can significantly reduce energy bills by adding an "R"-value of up to 4.0 to your existing wall's R-value.

## Exceptional Durability.

Super Energy Wall fills out the profile of the vinyl siding, increasing the overall impact resistance by over 3 times. This helps it to maintain its original shape through everyday mishaps — and extremes of weather — and adding years to its life.

## Superior wind resistance.

There is an extra tough nail hem to keep panels locked in place, even in winds exceeding 150 mph.

## Advanced Panel Design.

A patented locking system pulls panels tight at the wall. Extra-thick panels stay flat and overlaps are minimized, producing walls with the smooth, even appearance of solid wood. Added rigidity helps span faults in walls, assuring straight course lines that last.

## Unmatched appearance.

The patented locking system also provides consistent "board-to-board" appearance.

## Outstanding beauty.

Classic 4½" clapboard and Dutch lap profiles, along with a richly detailed grained cedar texture, adds the look and feel of wood. Deep, realistic shadow lines and a low-gloss, 'look of paint' finish add to the appeal.

## Easy-care maintenance.

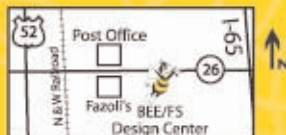

BEE Super Energy Wall Vinyl Siding is made with durable premium vinyl, so it won't warp, rot or peel, and it never needs painting. Just wash occasionally with a garden hose to restore like-new beauty.

## Mold Resistant.

Super Energy Wall discourages the development of mold, and offers superior sound insulation.
